Subject: [the\_conductor] Build 311 - Windows Vista and Windows XP  
Reply-To: [the\\_conductor@yahoogroups.com](mailto:the_conductor@yahoogroups.com)

All...

Microsoft Vista is supported with Train Tools build 311. The auto registration detection does not work correctly on windows Vista. This will be fixed in build 312. Follow the step below.

1. After you install Train Tools® software on vista, run the registration tool and enter your password. (Program->Train Tools->Train Server Tools->Registraion)

There are no differences in the software between windows XP and windows Vista. The multi user support for windows Vista has been in Train Tools software since the late 90's, so the changes we made were minor (installer based).

Vista compatibility information:
