[JMRI DecoderPro update 0.9.2 is available](#)

2002-04-14 22:25

The 0.9.2 update to the DecoderPro program and JMRI libraries is available for download.

The update file is in .zip format, and should be usable on Macintosh, Windows, Linux and OS/2. You can download it from SourceForge by following this

link:

<http://sourceforge.net/project/showfiles.php?group_id=26788&release_id=84662>

This update contains only updated files; you need the entire 0.9 distribution to use the program. If you don't have that, please see the JMRI and DecoderPro README files for how to download and install it:

<http://jmri.sourceforge.net/demoFiles/DecoderPro.README.html>

<http://jmri.sourceforge.net/demoFiles/JMRIdemo.README.html>

To install this update, copy the "jmri.jar" file and the "xml" directory to your existing DecoderPro or JmriDemo directory. That's all that's needed!

New features in this update:

Updated Soundtraxx DSD/DSX Diesel definitions to fix a programming error

Cleaned up LocoIO programmer interface

New features in the 0.9.1 update, also included here:

Additional decoder definitions:

Many Lenz decoders, courtesy Debbie Ames and Lenz USA

Updates to Soundtraxx decoders, additional types

New EasyDCC support in DecoderPro and the JMRI tools

LocoIO programmer for both early (1.3.2) and later (1.3.4) LocoIO PIC code.

Initial support in JMRI libraries for:

Remote LocoNet server and client

CTC panel edit, store, load

C/MRI serial attachment

Note that these are still in development, and should not be considered ready for general use.

Various minor bug fixes and updates, including reduced memory usage and improved error logging.

--

Bob Jacobsen (Bob_Jacobsen@lb..., 510-486-7355, fax 510-495-2957)
