

# Jacobsen Declaration Exhibit AT

## What's new at KAM Industries

KAM supplies software tools and development kits that allow end users and software developers to use the National Model Railroad Association Digital Command Control Standard (DCC) to run the home and club model railroad layouts. DCC is a protocol specification for Engine and Accessory decoders. These decoders fit into all scales Z - 1 and may be purchased from your local hobby shop.

### New products from KAM!

- **Engine-Commander(tm) 2.0 beta** production to be available **Apr 10** for Windows 95 and Windows NT users via ftp. All snail mail requests will receive a diskette release beta. KAM Industries will not be releasing Engine-Commander for Windows 3.x environments.
- Check this location on for latest schedule download a free evaluation copy when ready!

#### Preliminary features of Engine-Commander 2.0 beta 1 (available 1/10/97 at <ftp://kam.rain.com>)

Engine Commander 2.0 is an unreleased product. Product features may change. Product development delay due to driver difficulties.

- OLE drag n drop support (engine, feedback, accessories and turnouts)
- Database support for decoders w/ full print capabilities; download speed tables from the Web!
- Integrated scripting basic - **Train-Basic included!**
- Windows 95 and Windows NT support only - Yes windows 95 does run on a 8 Mbyte 20 Mhz 386!
- Context execution supported from disktop for all active object (throttles, switches etc.)
- Controllers supported: System One, Master Series, RamFXX, Lenz, Digitrax, NMRA + others
- Programming support not implemented

#### Preliminary features of Engine-Commander 2.0 beta 2 (available 1/10/97)

Engine Commander 2.0 is an unreleased product. Product features may change.

- Support for Visual Basic version 3 & 4 - Why write your own driver? Let Engine-Commander do it!
- Windows 95-97/NT certified application - Q1 97
- Dual controller support; on multiple serial ports ( 1 - 10) so you can run one controller on one port and different controller on the other port.

### Check out Other NMRA DCC Suppliers!

- [Digitrax](#) DCC control system
- [Lenz Digital Plus](#) DCC control system

- [Ramtraxx](#) DCC control system
- [System One](#) DCC control system
- [Rutger's](#) DCC hobby page! Lots of neat stuff!
- future ZTC Home Page pointer! - More DCC
